SUMMARY

Junior Software Engineer currently working as a Contract Software Developer, with hands-on experience developing full-stack web applications, GIS dashboards and REST API integrations using React, Next.js, TypeScript, C#, ASP.NET and SQL databases. Experienced in translating user requirements into responsive, data-driven software solutions, debugging application issues and collaborating with stakeholders throughout the software development lifecycle.

EDUCATION

Universiti Kuala Lumpur – Malaysian Institute of Information Technology, Kuala Lumpur

Bachelor of Information Technology (Hons.) in Software Engineering CGPA : 3.25 February 2023 - July 2026
Graduation: November 2026

Politeknik Sultan Abdul Halim Mu’adzam Shah, Jitra

Diploma of Information Technology (Digital Technology) CGPA : 3.40 June 2019 - December 2022

CERTIFICATES

Google Project Management Professional Certificate — Google / Coursera January 2025

WORK EXPERIENCE

RayaTech Sdn. Bhd., Kajang, Selangor

Software Developer — Contract July 2026 – Present

- Continued developing and maintaining full-stack web application modules using React, Next.js, TypeScript and REST APIs after completing the internship.
- Enhanced GIS dashboards, time-series visualizations and API integrations for the NAWABS river basin monitoring system.
- Diagnosed and resolved TypeScript, API response, data-mapping and UI rendering issues to improve system reliability.

Software Development Intern

March 2026 – July 2026

- Developed 6+ GIS dashboard modules using React, Next.js, TypeScript, Leaflet and Recharts.
- Integrated 15+ REST API endpoints for rainfall, water level, discharge, dam, runoff, pump and WTP data.
- Implemented interactive GeoJSON map layers, station markers and time-series visualizations.
- Debugged TypeScript, API integration, data-mapping and UI-rendering issues.

MY FALAH NIAGA, Alor Setar, Kedah

May 2022 - September 2022

Website Developer Intern

- Developed and updated product pages using HTML, CSS, and basic JavaScript.
- Maintained product listings, pricing, descriptions, and website content accuracy.
- Improved webpage layout, product image arrangement, and minor UI elements.
- Troubleshoot basic website formatting issues to support smooth website operation.

PROJECTS

River Basin Monitoring Dashboard for NAWABS System

React, Next.js, TypeScript, JavaScript, Leaflet/GIS, REST API, Recharts

- Developed 6+ GIS dashboard modules for river basin monitoring using React, Next.js, TypeScript, Leaflet, and Recharts.
- Integrated 15+ REST API endpoints for discharge, water level, rainfall, dam, runoff, and water treatment plant monitoring.
- Implemented interactive map layers, GeoJSON overlays, station markers, operational panels, and time-series charts.
- Improved application performance and usability by optimizing chart rendering, station filtering, and GIS-based data visualization workflows.
- Performed functional testing and debugging across frontend data flow, REST API responses, TypeScript logic, and UI rendering to improve application reliability.

Pasaraya.my E-Commerce Admin Dashboard

React, TypeScript, MedusaJS, REST API, AG Grid, PostgreSQL

- Developed seller and bazaar management modules using React, AG Grid, PostgreSQL, and REST APIs to streamline internal data management workflows.
- Built responsive AG Grid data tables supporting CRUD operations, search, filtering, and pagination.
- Translated internal user requirements into REST API-driven CRUD workflows for insert, update, search, filtering, and data management operations.
- Designed PostgreSQL stored procedures, relational data operations, and backend API integrations to support reliable CRUD functionality.
- Debugged TypeScript, API integration, and UI rendering issues to improve dashboard functionality.

BDB Vehicle Booking System - Web Application

ASP.NET WebForms, C#, MySQL, Bootstrap 5, jQuery, Chart.js

- Designed and developed a full-stack enterprise vehicle booking system using ASP.NET WebForms, C#, MySQL, and REST APIs for multiple subsidiaries.
- Implemented secure application features including role-based access control, account lockout, session management, and audit logging.
- Implemented two-stage approval workflow with HOD and Admin approval and email notifications.
- Built role-based admin dashboard with real-time booking statistics, approval workflows, and audit logging.

BDB Vehicle Booking System - Mobile Application

Flutter, Android Studio

- Developed companion mobile app for vehicle booking with damage photo upload functionality.
- Integrated with ASP.NET Web API for real-time booking status and vehicle availability.
- Implemented smart return workflow with damage documentation and automatic maintenance status updates.
- Developed a responsive mobile interface for vehicle booking, status tracking, and return management.
- Developed a REST API integration layer connecting the mobile and web applications.

CORE COMPETENCIES & SKILLS

Languages

TypeScript, JavaScript, C#, SQL, Python, HTML, CSS, PHP

Frameworks & Libraries

React, Next.js, ASP.NET WebForms, Tailwind CSS, Bootstrap 5, jQuery, Flutter

Databases

MySQL, PostgreSQL, SQLite

Tools

Git, GitHub, Postman, Visual Studio Code, pgAdmin, Android Studio, Chrome DevTools, XAMPP

Technical Skills

REST API Integration, JSON Data Handling, CRUD Operations, SQL Query Writing, PostgreSQL Stored Procedures, Database Normalization, RDBMS, Functional Testing, API Testing, Debugging, SDLC, Agile/Scrum, Secure Coding Principles, Problem Solving, Stakeholder Communication
